AT YOUR FINGERTIPS

TRANSPARENT OLED TV

In our portfolio you will also **find transparent OLED screen with Touchscreen function**, which adds direct interactivity to an exceptional visual experience. This touch screen allows viewers to control digital content by simply touching directly on the screen, opening up new possibilities for product presentations, interactive galleries or modern information kiosks.

By combining transparency and touch technology, we create an environment in which the visitor not only interacts with the digital content, but becomes **its direct part of**.

Specifications

Parameters
