

NEW LEVEL OF PRESENTATION

LED Poster CLT P1.87

The LED poster is a new product within the event market that is gradually **becoming a standard for every conference** and is slowly replacing printed media platforms. The LED poster is a digital display device made up of high-resolution LED segments placed in a sleek, slim design structure.

The main advantage of a LED poster is its quick installation time, easy transportation, and the ability **to change the content in a few seconds via a mobile app.**
